

# Breviin Clones Codex

(Official document)

## **Introduction**

This document outlines the cloning process and practices used by Breviin Scientists and researchers.

It also outlines Clan Breviin's policy on clones and its public stance towards other practices.

## **Clone Definition**

A DNA sequence, such as a gene, that is transferred from one organism to another and replicated by genetic engineering techniques.

## **Breviin's Cloning process**

Breviin cloners extract DNA strings from different warriors and species and then they insert the DNA strings into hosts.

Clones genetically identical to another. In essence this form of cloning is an asexual method of reproduction, where fertilization or inter-gamete contact does not take place

Breviin's clone troopers are created using Kaminoan technology.

With Mandalorian warrior DNA from clan Breviin warriors as template, researchers have been able to successfully create clones with accelerated growth to meet any army requirements.

Researchers have been able to mix the Mandalorian DNA with codes from other races to provide the best of both kinds, the results have been amazing, each squad may be composed of different races to provide a balance on their skills.

Clones grow to a biological age of 25; when they reach that age, cloners use a modified virus strain that attacks all the cells in their bodies, but instead of destroying them it combines its DNA strings with the cell's; the DNA strings that are inserted replace the accelerated growth genome, therefore they stop aging for proximately 30 years, then they start aging at the specie's normal rate.

Employers must commit to paying them salaries and complying with a contract that is specified in the Annex of this document.

## **Breviin's policy on clones**

Clan Breviin constantly produces clones for the recruitment centers all over the galaxy to generate a constant flow of income for the clan.
